- Thesis:** *The role of diet in irritable bowel syndrome: current perspectives between clinical nutrition and food technology.*
- Key subjects:** metabolic syndrome and intestinal diseases; eating disorders and hormonal regulation; food intolerances, immunity and drugs; nutritional analysis methods.

UNIVERSITY OF PALERMO

Palermo

BSc in Agri-Food Science and Technology

2018 – 2024

- Key subjects:** microbiology of food and fermented products; food technology; nutraceutical chemistry and nutrient metabolism; food hygiene and inspection.

CONTINUING EDUCATION

- BIA START: understanding and interpreting the BIA method** | Akern Academy 2026
- The malnourished patient: a challenge for the nutritionist** | SIFA, online 2026
- Incretin therapy and precision nutrition in obesity** | SIFA, online 2026
- Managing side effects of incretin-mimetic drugs** | SIFA, online 2026

LANGUAGES AND INTERESTS

- Languages:** Italian (native); English B1 (intermediate).
- Interests:** I am passionate about the link between **food, health** and **well-being**, which I carry beyond my studies: in the **kitchen** I experiment with recipes and **doughs**, putting into practice what I have learned about ingredients and food technology. I play team sports such as **football** and **padel** and keep up with **digital innovation**.
